 Derwent **( EP1116484A ) Novelty - Treatment of a cosmetic is by near infrared (NIR)**

Abstract: irradiation before, during or after application of the cosmetic.

**Use** - The product is a cosmetic obtained by NIR irradiation (ie. as a result of in-situ polymerisation or increase in mol. wt. of a polymer or changes in its properties) and is used for treatment of the skin, hair or nails. It is especially a permanent-waving preparation, hair-lotion, -rinse, -emulsion, -conditioner, -fixer, -spray, -mousse, -gel, -growth agent or -dye, shampoo, leveller, hot oil preparation, antidandruff or anti-hair loss agent; a nail-care agent or nail lacquer; or a W/O or O/W day or night cream, eye-, face-, bleach-, vitamin- or antiwrinkle-cream, moisturiser, skin cleanser, baby-care product or decorative cosmetic (claimed).

**Advantage** - The dangers and lack of effectiveness associated with prior-art methods using eg UV, heat or oxidation are avoided; the NIR irradiation is unexpectedly effective with a wide range of monomers, pre-polymers and polymers

present in the formulations.
